Objective :

The collection of students' feedback is a mechanism to evaluate the progression of students. The feedback is primarily collected from the students in order to understand their perspective regarding the overall infrastructure of the institution and to identify different levels of satisfaction and dissatisfaction germinating among them so that the institute can facilitate better service to the students for their wholistic development. The feedback data is collected from the students of 2022-2023 session.

Methodology :

The students' feedback data is collected through the Student Feedback Form (in the hardcopy format) which was circulated among the students of 2022-2023 session. They were asked to fill up the form at home. The filled- up form was collected by the office staff. The total no. of responses collected is 215. We have used pie chart to analyze the collected data. The responses were collected using the five- point scale (Excellent, very Good, Good, Satisfied and Not- satisfied).
